

LMOL Report for 2018-06-28

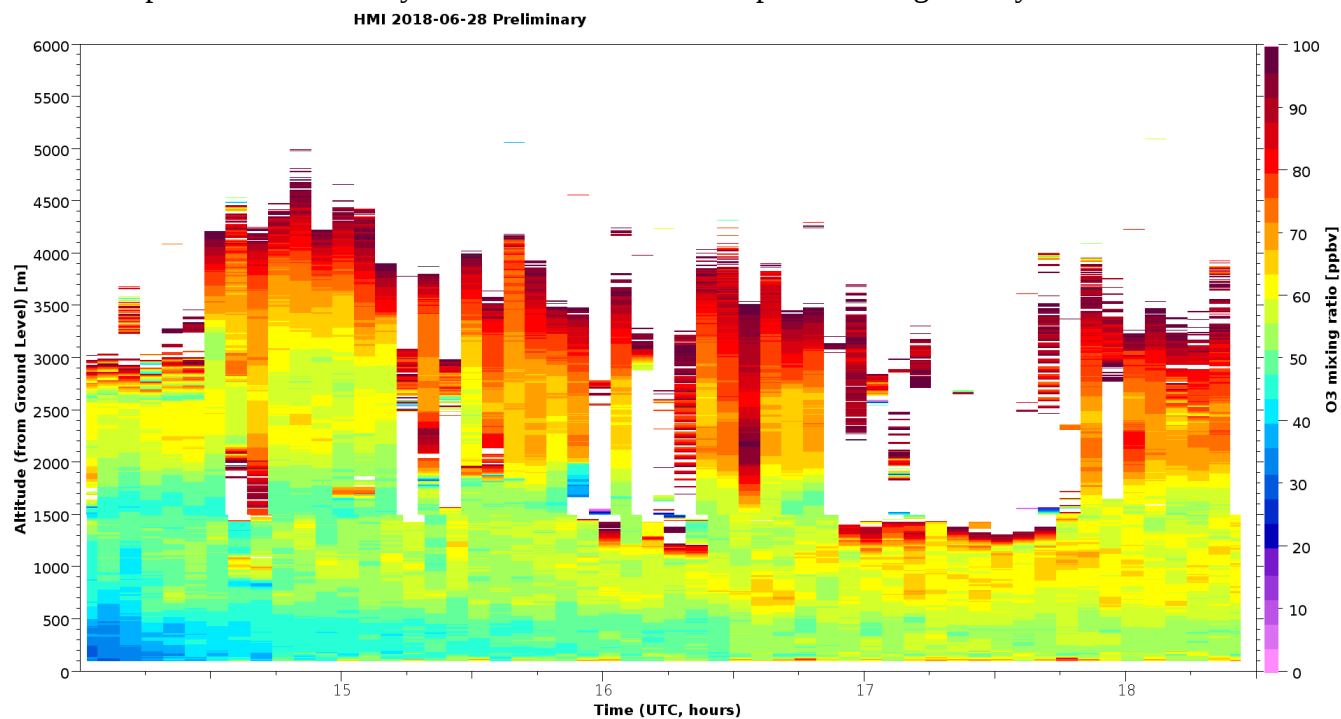

Contact: G. Gronoff

LMOL Team: W. Carrion, T. Berkoff, J. Sparrow, G. Gronoff

Operator for the day: W. Carrion

LMOL / Lidar

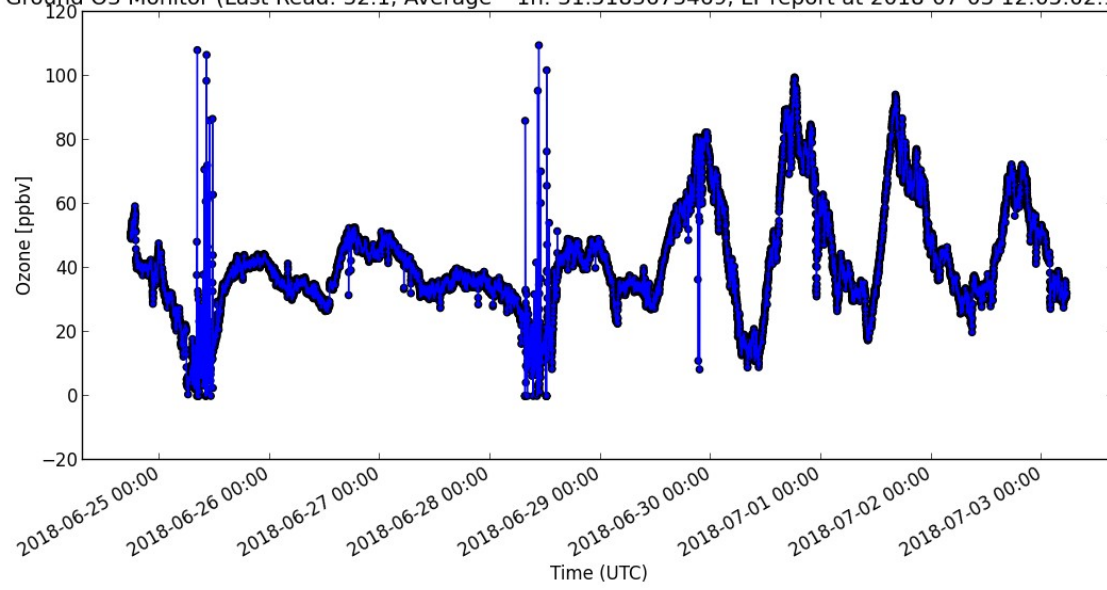

The Lidar performed nominally. A few clouds are to be reported during the day.

LMOL / Weather Station and Ground O3

The POM data are to be validated: they are generally lower than the NOAA data, but whether it is from the instrumentation/tubing or from the location (lower altitude, shade) remains to be solved.

Ground O3 Monitor (Last Read: 32.1, Average ~1h: 31.5183673469, LT report at 2018-07-03 12:05:02.173095)

The Weather station performed nominally until the power outage.
